# **DETAILED ACTION**

# Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 2/14/2006 has been entered.

## Information Disclosure Statement

The information disclosure statement (IDS) submitted on 2/14/2006 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

# Allowable Subject Matter

Claims 1-3 and 5-27 are allowed.

The following is an examiner's statement of reasons for allowance:

In re independent claim 1 and dependent claims 2-3, 5-12, and 27, the prior art fails to teach or fairly suggest a method of imaging an object using radiation comprising in combination with the rest of the claim limitations, the steps of, obtaining projection data from the at least one real detector array, the at least one real detector array obtaining projection data at two or more positions on the gantry, and having a

geometry that is neither equilinear nor equiangular and, reprojecting the projection data on to a virtual detector array that has a geometry that is either equilinear or equiangular as recited by claim 1. Dependent claims 2,3,5-12, and 27 are allowable by virtue of their dependency.

In re independent claim 13 and dependent claims 14-23 and 28, the prior art fails to teach or fairly suggest a system for imaging an object using radiation in combination with the rest of the claim limitations, comprising, at least one real detector array that obtains projection data at two or more positions on the gantry, and has a geometry that is neither equilinear nor equiangular and, a data processor for reprojecting the projection data onto a virtual detector array that is either equilinear or equianglular as recited by claim 13. Dependent claims 14-23 and 28 are allowable by virtue of their dependency.

In re independent claim 24, the prior art fails to teach or fairly suggest a system for imaging an object using radiation, comprising the means for obtaining projection data from at least one real detector array, the at least one real detector array obtaining projection data at two or more positions, and having a geometry that is neither equilinear nor equiangular, and the means reprojecting the projection data on to a virtual detector array that has a geometry that is equiangular as recited by claim 24.

In re independent claim 25 and dependent claim 26, the prior art fails to teach or fairly suggest a method of imaging an object using radiation in combination with the rest of the claim limitations, comprising the steps of: obtaining projection data from at least one real detector array, the at least one real detector array obtaining projection

data at two or more positions, and having a geometry that is neither equilinear nor equiangular and reprojecting the projection data onto a virtual detector array having an equiangular geometry as recited by claim 25. Dependent claim 26 is allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
